

FRONTIER ACCELERATE FOR SECURITY

See your security gaps, and how to close them.

A discovery-led engagement that maps your needs to the right Microsoft Security capabilities, configures them in your own environment, and shows you real findings, before you invest.

ENVISIONING & POC - IN PARTNERSHIP WITH MICROSOFT

THE OPPORTUNITY

Three questions this engagement answers

Security decisions are hard to make in the abstract. This engagement replaces guesswork with evidence drawn from your own estate.

1

Where are we exposed?

A structured discovery across identity, cloud, threat and data security, mapped to your real environment.

2

What would actually help?

The Microsoft Security capabilities matched to your priorities, chosen with you, not pushed.

3

Does it work for us?

Tools configured in your production environment and left to surface real findings you can see.

WHAT THE ENGAGEMENT COVERS

From discovery to evidence in your own estate

1

Discover and map your needs

We assess your priorities and map them to the domains that matter most: identity and access, cloud, threat protection and data security.

2

Select the right capabilities

Together we choose the Microsoft Security modules to trial, scoped to your needs rather than the whole portfolio.

3

Configure in your environment

We configure the selected tools in your production environment and let them collect real data over two to three weeks.

4

Review findings and next steps

Joint review sessions and a final report set out what we found and the agreed, prioritised next steps.

WHAT YOU GAIN

Security decisions grounded in evidence

1

A clear view of exposure

Real findings from your own estate, not a generic risk checklist.

2

A shortlist of what helps

The specific Microsoft capabilities matched to your priorities.

3

Proof it works for you

Tools running against your real data, so value is demonstrated.

4

An agreed action plan

Prioritised next steps your team can move on with confidence.

WHAT IT COVERS

The Microsoft technologies we bring to life

IDENTITY

Microsoft Entra

Protect who gets in and what they can reach.

THREAT

Microsoft Defender

Detect and respond across endpoints, email and cloud.

DATA

Microsoft Purview

Classify, protect and govern sensitive information.

CLOUD

Defender for Cloud

Posture and workload protection for your cloud estate.

WHY BUI

Delivered by a partner Microsoft trusts

BUI is a Microsoft Azure Expert Managed Services Provider and a Microsoft Solutions Partner across all six cloud solution areas, with nine Advanced Specialisations and a two-time Microsoft Country Partner of the Year (2023 and 2024). We deliver end to end, and stay with you as you scale.

Ready to start? Connect with your BUI account team to scope your Security Envisioning and POC.

See where you stand, in weeks.

A discovery-led envisioning and proof of concept, configured in your own environment, so your next security decision is grounded in evidence.
